FUNCTIONALITY:

- modern modules of compensation,
- external devices control,
- heating of the gas injectors,
- extensive diagnostic,
- auto-calibration,
- compatibility with OBD standards available on the market.

We protect the highest quality

ZENIT PRO

Controller was created in response to the increasing level of technology in automotive industry. Our engineers took up the challenge and the innovative controller which corresponded to the demand of modern automotive electronics was created. **ZENIT PRO** is available in two versions: standard version and extended version with OBD module.

ELECTRONICS:

- ZENIT PRO/ZENIT PRO OBD controller,
- integrated MAP sensor,
- switch,
- wiring.

ZENIT PRO system is an universal component of the autogas system. After considering the parameters of the engine, its other components are selected. The main objective in designing **ZENIT PRO** controller was meeting demands of innovative electronics, and as a means to achieve this goal was the connection with the vehicle's on board diagnostics system.

ZENIT PRO and **ZENIT PRO OBD** systems are dedicated to 4, 6, 8 cylinders cars. **ZENIT PRO** controller is made of highquality components, and hermetic enclosure meets the integrity standards used in automotive industry.
