FUNCTIONALITY:

- test of correct connection of petrol injectors
- adjusting the gas mixture during full opening
- light brightness control of the switch
- constant switching of the selected cylinders to petrol
- cooperation with the RS232 interface
- possibility to change the cylinder assignment
- RPM reading of the camshaft sensor
- a quick start on gas

- sequence acceleration
- built-in fuel emulator
- OBD Scan Tool
- gas injectors efficiency test
- credit function
- automatic software upgrade
- buzzer test
- frozen frame

ZENIT BLACK BOX

Black Box platform is a new ECU model from the Zenit family. Zenit Black Box is an unrivaled autogas installation of the premium category, which outclasses competitive brands due to the universality and performance of the platform. It is dedicated to cars with indirect petrol injection with 3, 4, 5, 6 and 8 cylinders. It is available in 3 versions: basic, OBD and OBD with emulator.

**BEST PART
OF DRIVING**

ELECTRONICS:

- the highest quality Zenit Black Box controller
- checked and praised wiring
- MAP sensor with gas temperature sensor
- NEW switch with modern design
- reducer temperature sensor

The Zenit Black Box platform, in every available version, skilfully learns from the petrol controller of the car. It can adapt to the strategy of fuel dosing. Basing on the collected data, in the most efficient way it selects the gas dose necessary to the work of LPG & CNG installation. This results in the maximum efficiency of the gas supply in the vehicle and finally in the driver's comfort of use.
